PETER ODURO TWUMASI SENIOR

Welder | Precision Welding & Fabrication Technician

Accra, Ghana| +233 55 371 1661 | twumasisenior95@gmail.com | linkedin.com/in/peter-oduro-twumasi-ba642b381

PROFESSIONAL PROFILE

Dedicated Welder with practical training and hands-on experience in welding and metal fabrication. Trained in Shielded Metal Arc Welding (SMAW) and Gas Metal Arc Welding (GMAW/MIG), with experience performing welds in flat, horizontal, vertical, and overhead positions. Skilled in thermal cutting, steel fabrication, reading technical drawings, quality inspection, and maintaining safe workshop practices. Recognized for reliability, teamwork, accountability, and attention to detail. Seeking to contribute strong welding and fabrication skills to a construction, manufacturing, engineering, or industrial workshop.

CORE SKILLS

- Shielded Metal Arc Welding (SMAW)
- Gas Metal Arc Welding (GMAW/MIG)
- Welding & Metal Fabrication
- Structural Steel Fabrication
- Position Welding (Flat, Horizontal, Vertical, Overhead)
- Thermal Cutting
- Grinding and Finishing
- Reading Technical Drawings
- Quality Inspection
- Workshop Safety (HSE)
- PPE Compliance
- Basic Equipment Maintenance
- Teamwork
- Time Management
- Problem Solving

RELEVANT EXPERIENCE

Precision Welding Trainee *September 2025 – Present*
Design and Technology Institute (DTI)

- Performed welding in flat, horizontal, vertical, and overhead positions using SMAW and GMAW processes.
- Fabricated steel components by interpreting technical drawings and following project specifications.
- Conducted thermal cutting, grinding, fitting, and finishing operations during fabrication projects.
- Performed visual quality inspections to verify weld quality and dimensional accuracy.
- Maintain a safe workshop environment through proper use of PPE and compliance with workshop safety procedures.
- Worked collaboratively with instructors and fellow trainees to complete practical fabrication assignments.

Metal Fabrication Intern *September 2025 – Present*
Accents & Art Limited

- Assisted in fabricating steel products including gates, frames, and custom metal works.
- Supported fabrication, assembly, finishing, and installation activities under supervision.
- Operated fabrication equipment safely and assisted with workshop maintenance.
- Maintain clean and organized work areas while following workplace safety procedures.

EDUCATION

Precision Welding & Fabrication (AWS SENSE Level 1) *September 2025 – Present*
Design and Technology Institute (DTI)

Welding and Fabrication Technology (CTVET Level II) *March 2023 – July 2025*
Kumasi Technical Institute

TECHNICAL PROJECTS

- Fabricated steel workpieces using SMAW and GMAW while maintaining dimensional accuracy and weld quality.
- Completed fabrication projects involving thermal cutting, grinding, fitting, welding, and finishing.
- Produced fabricated metal products by following engineering drawings and workshop specifications.

ADDITIONAL SKILLS

Languages: English, Asante Twi

Professional Attributes: Integrity, Accountability, Strong Work Ethic, Attention to Detail, Teamwork, Adaptability, Willingness to Learn
